

Agrément South Africa Welcomes New Certificate Holders at Handover Ceremony

On **20 August 2025**, Agrément South Africa (ASA) proudly hosted a **Certificate Handover Ceremony and Induction Session** at its offices in Pretoria, marking an important milestone for innovation and quality in South Africa's built environment.

The event was led by ASA's Chief Executive Officer, **Mr. Richard Somanje**, who officially handed over certificates of approval to the following companies:

1. **Greencrete Construction**
2. **Panelman Engineering**
3. **ConcriteWalls**
4. **RF Spunbond**

These companies, now officially recognized as ASA certificate holders, have demonstrated compliance with the stringent standards and technical requirements that underpin ASA certification.

The new certificate holders also participated in an **induction session**, where they were introduced to ASA's processes, compliance obligations, and the diverse benefits that come with holding ASA certification. The session also highlighted the role of certified products in advancing **innovation, sustainability, and quality assurance** within the South African construction sector.

In his address, Mr. Somanje emphasised the importance of certified innovative building technologies (IBTs) in addressing housing challenges, supporting infrastructure delivery, and promoting economic growth. He congratulated the recipients and encouraged them to continue driving **excellence and innovation** in their respective fields.

The ceremony reaffirmed ASA's commitment to working hand-in-hand with industry stakeholders in ensuring that innovative products and technologies contribute to building a resilient and future-ready South Africa.

Congratulations to all the new certificate holders! ASA looks forward to continued collaboration in promoting innovation, quality, and sustainability across the built environment.
